

TRI-MOUNT™ INSTALLATION = 3x installation options

The TRI-MOUNT™ sink is an innovative and patented* design that pioneered the “flush-mount” utility in the kitchen and bath industry. The Mila “true” flush-mount sinks are built specifically for flush-mounting to the countertop. The dramatic effect it creates has changed the way kitchen and bath sinks are specified in the industry.

*U.S. Patent No. 9,988,799 Canadian Patent No. 2579506

WHY FLUSH-MOUNT?

The advantage of flush-mounting a sink has several major benefits. It can eliminate damages to the countertop around the sink opening, reduce recurring water seal/caulking maintenance, eliminate areas under the countertop around the sink opening where dirt, germs, mildew, and mold accumulate. This is why “Flush-mount” installation is superior to under-mount and top-mount installation.
