

Step 5c: SINK INSTALLATION

Once step 5a and 5b are completed, carefully place the sink back into the countertop opening. Apply gentle and even pressure at the bottom of the bowl by using your body weight. When the sink stops moving downward and the sink is flushed with the countertop **STOP!**

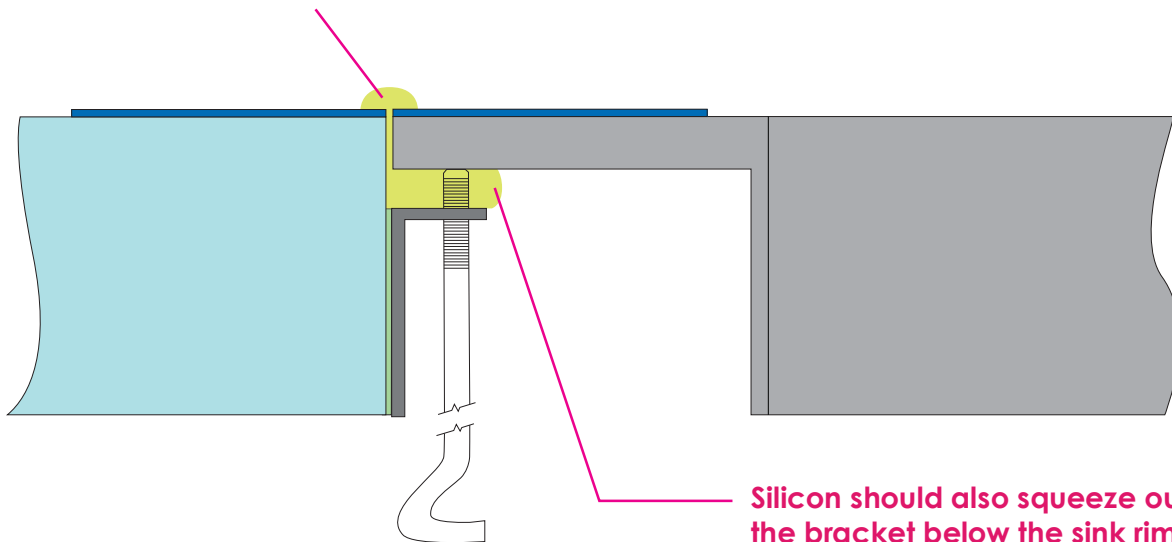

Downward pressure ONLY.

Press down firmly

***Extra silicon must squeeze out from the seam between the sink rim and the counter top.**
This creates an impenetrable seal between sink rim and countertop.

Silicon should also squeeze out from the bracket below the sink rim.

*** Once Step 5c is completed, proceed immediately to Step 5d.**
